INFM 600 R Plot Draft

Component	Comments	Worth	Given
Does the R script load necessary packages and include useful comments?		1/5	1
Does the R script include clear labeling of axes, charts (titles), and legends?	see below	1/5	1
Does the R script implement plots that are appropriate for the variables or combinations of variables examined?		2/5	2
Are plots resulting from the R script included in a folder along with the R script?	no - a couple up the top but not all of them	1/5	1

Total: 5

General Comments:

ggplot2 ⟩ 1.5
xkcd ⟩

(6.5)

Don't forget to add titles to plots!
i.e. "Annual occurence of tornadoes in the Northeast US"

Would be great to see all the regions on a single plot (eg the way experts are shown) — that might be easier to interpret.

or stacked bars
